- Sketch
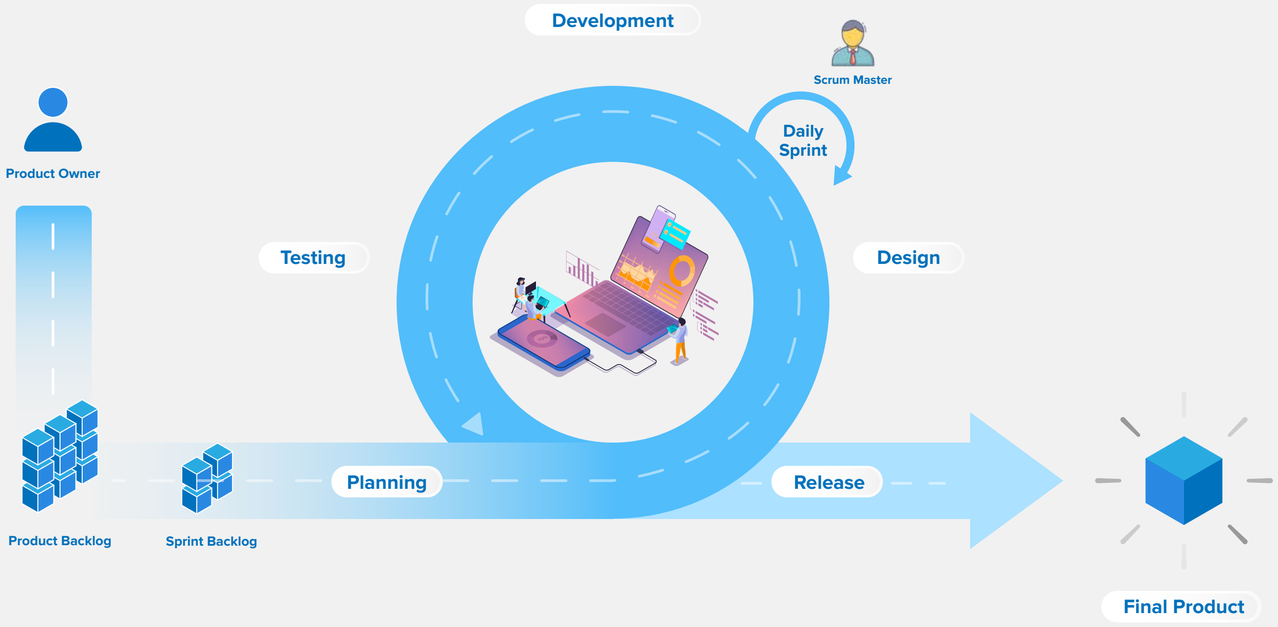
- Figma
- InVision
- Ionic design
- Angular Design

Development Approach

A G I L E M E T H O D

Based on the client requirement & type of the project we prefer to go with the appropriate project execution methodologies & approach. It helps for development of high-quality IT products that meets or exceeds customer expectations, reaches completion within times & cost estimates.

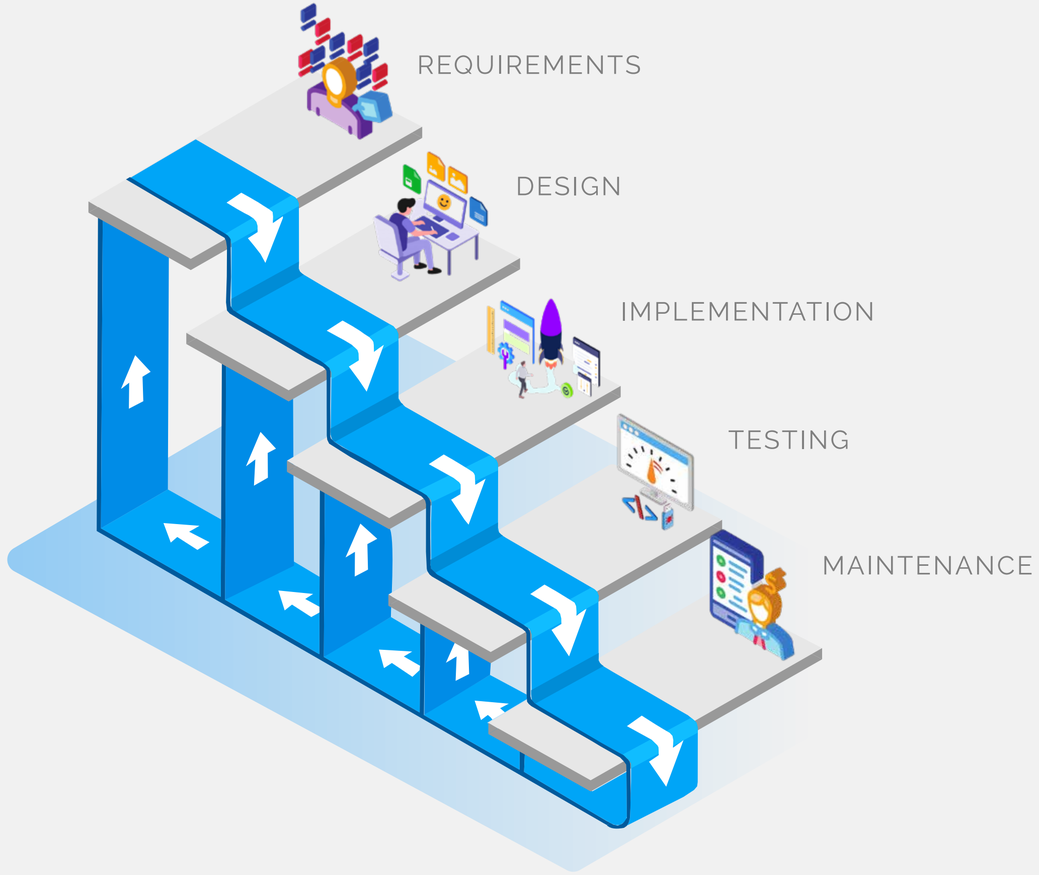


When to use

- Few Initial Product & Regulatory Requirements
- Lenient Processes in Place
- High Product Owner Involvement
- Innovative product development from scratch
- Short, Flexible Timeline
- Budget with Wiggle Room

WATERFALL METHOD

The Waterfall methodology is the traditional and the most common methodology used for project management. It follows a sequential, linear process which is why it is often described as a “linear-sequential life cycle model”.



When to use

- Many Initial Product Requirements & Strict Regulatory Requirements
- Strict Processes in Place
- Low Product Owner Involvement
- Enhancement to an Existing Product
- Fixed & Firm Timeline
- Fixed, Inflexible Budget

Why Choose Mindzap?

Vision + Hardwork + Consistency

At Mindzap Quality is our ultimate business plan. We consider every aspect which matters to clients' data security and intellectual property protections. We believe that transparency is needed to create trust, and so it is integral part or Mindzap culture. It give us utmost confidence to provide a visibility regarding the development process to the clients. Being your technology partner we make sure to deliver right combination of technologies for your need and excellent result of it.
